PROJECTS

MTA Realtime Transit App, Hackathon Project | [GitHub Link](#)   Aug 2025

- Built a mobile app with Expo (React Native, TSX) that displays real-time NYC subway and bus alerts using the MTA GTFS-RT API.
- Built a full-stack transit app using Expo (TypeScript/React Native) and Node.js/Express, integrating the MTA real-time Transit API with fallback mock data for reliability
- Collaborated in a team of 4 to deliver a working prototype in 55 hours, showcasing skills in full-stack development, REST APIs, and agile teamwork.

Traffic Pattern Analysis & Collision Trends In Manhattan | Oct 2024 – Dec 2024

- Collaborated in a team of 3 to analyze NYC Open Data ("Motor Vehicle Collisions – Crashes" & "Automated Traffic Volume Counts") and study holiday/event impacts on Manhattan traffic.
- Applied statistical methods including t-tests and Poisson regression to evaluate crash severity and frequency across boroughs, holidays, and time periods.
- Developed data visualizations (bar plots, regression outputs) to highlight traffic patterns and provide actionable recommendations for traffic safety planning.

RELEVANT EXPERIENCE

CUNY Tech Prep | New York, NY

Data Science Fellow   Jul 2025 – Present

- Selected for a competitive fellowship across 11 CUNY senior colleges, developing technical projects using Python, Jupyter Notebooks, Pandas, NumPy, scikit-learn, and SQL.
- Participate in weekly courses and learn industry best practices for exploratory data analysis (EDA), feature engineering, data collection and processing, statistical modeling, data visualization, machine learning techniques, data science process, and big data
