Spoken Languages: Chinese (Conversational)

PROJECTS

Traffic Pattern Analysis & Collision Trends in Manhattan   Oct 2024 – Dec 2024

- Developed a flask application that classifies images of fruits using machine learning.
- Implemented **S**VM, PCA Random Forest Classifier, and Neural Networks using Python, scikit-learn, Numpy, Pandas and Tensorflow with a validation accuracy of 55%, 91%, and 98% respectively.

RELEVANT EXPERIENCE

CUNY Tech Prep | New York, NY

Data Science Fellow   Jul 2025 – Present

- Selected for a competitive data science fellowship with students from across the 11 CUNY senior colleges where Fellows create technical projects using tools such as Python 3, Jupyter Notebooks, Pandas, Numpy, Scikit-learn, and SQL.
- Participate in weekly courses and learn industry best practices for exploratory data analysis (EDA), feature engineering, data collection and processing, statistical modeling, data visualization, machine learning techniques, data science process, and big data

SYEP | New York, NY

Social Media Marketing Intern   Jun 2023 – Aug 202

- Designed and produced 50+ branded graphics and promotional materials using Canva to enhance audience engagement across multiple channels.
- Planned and executed a cross-platform content strategy (Instagram, TikTok, X, Threads), scheduling and publishing 20+ posts per week to maintain consistent brand presence.
- Analyzed platform metrics to identify engagement trends, collaborating with the marketing team to refine content strategy and achieve 300% follower growth.

SUPPORTING EXPERIENCE

New York City Tech Bookstore & Café | Brooklyn, NY

Sales Associate   Jan 2025 – Present

- Assisted customers by using a proprietary search engine to locate and recommend books.
- Operated cash register and point-of-service credit-card system to process customer payments.

Instructions:

Please review the above resume sample, read over the instructions, and fill out your resume BEFORE your first meeting with your Career Coach

1. Share the file with your Career Coach on Google Docs with **EDIT** access.
2. At the top, ensure your personal information considers the following:
   a. Name: If you prefer to go by a nickname, put it in parenthesis between your first and last names,
      e.g. Stanley (Stan) Smith
   b. Phone number and email: remove these if you are going to share your resume publicly. Make sure you have a professional email address, such as your school email. E.g. SJSmith883@hunter.edu or joeyfatone@gmail.com, NOT JoeytheGoatey@hotmail.com
   c. Location - you do not need your full street address, only your city and state
   d. GitHub and LinkedIn - these should be live and up-to-date links; assume people will click these hyperlinks
3. Education: Only include your GPA if it is a 3.00 or above and only if you want to
   a. Relevant coursework: write the topic names of what you learned and not the name of the course. "CSDATASTC 135", doesn't mean anything to most people, but "Data Structures" does.
4. Skills: limit yourself to "hard skills," i.e. technologies you are able to use.
   a. You don't need to include your level of proficiency (except with spoken languages), but list your skills in order from strongest to least strong.
      i. *Never include "English," it's expected when applying to roles in USA*
   b. Avoid things like "time management," or "fast learner."
5. Projects: List 2 to 5 projects, depending on how much experience you have.
   a. Whenever possible, link to the project's repository or deployed site.
   b. If you have had a few internships, you keep to your strongest projects.
6. Experience: List your experience in reverse chronological order - the most recent thing goes at the top.
   a. Describe what you did at each experience, and the technologies you used (see the comments for helpful questions to keep in mind).
   b. Try to be specific and interesting. **Rather than list your daily tasks, explain special projects you took on and their impact on the company.**
7. Other things to include: Certifications, honors, activities (leadership or supporting experience), associations - prioritize things that are recent and relevant to your job search.
